

T8 HFI Stick-Lite

Suspended/Surface

Tube \varnothing 35mm

Cap \varnothing 38mm

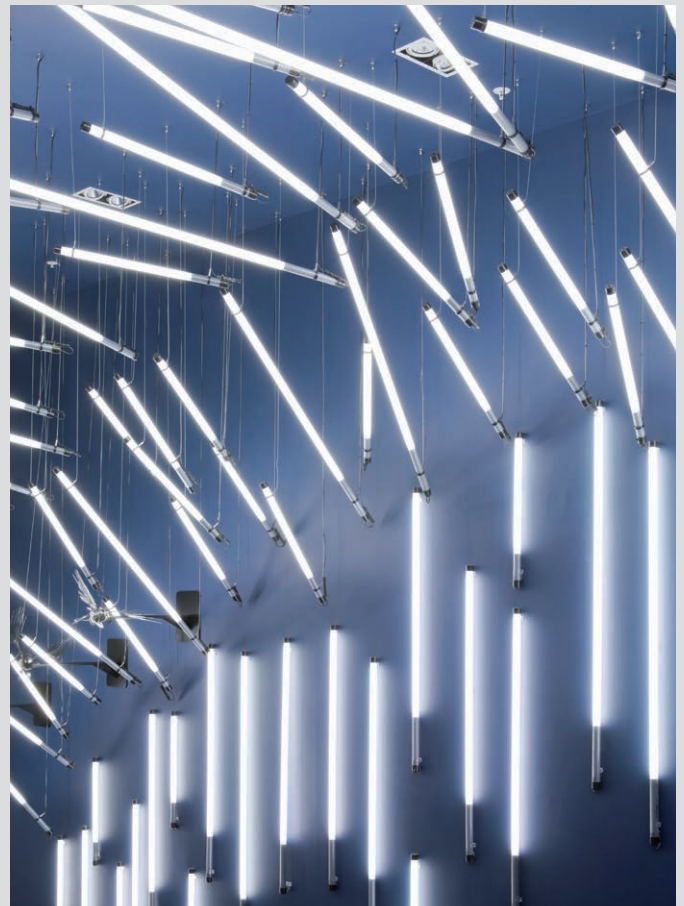

Light output 360°

Diffused Polycarbonate with fluorescent tube and ECG integral.

The T8 HFI is a popular option for window and shop displays, also used widely within the TV and theatre industry. Plug in, clip to walls, ceilings, suspend at any angle, or simply lean one in the corner, instant effect easy to use. Choose any colour light output and black or white end caps. There is also an LED version of the HFI range, see LED Stick-Lite in Products.

T8 HFI Stick-Lite

Suspended/Surface
