

FEP Safety

Coated fluorescent lamps

ILLUMINATING BY DESIGN

Specification

- FEP lamps can be used in open or enclosed fittings, including IP65 type units with either switch start or electronic ballasts.
- FEP coating can also be specified on long life lamps, with a coating life in excess of 50,000 hours.
- FEP coatings will not discolour or degrade and still contain glass should a lamp break at the end of its life, creating peace of mind for users and contractors, creating a better environment for everyone.
- FEP coated lamps are recognised by the British Retail Consortium, and pass all hygiene audits associated with the food, packaging and pharmaceutical industries.
- Impact test, manufactured to IEC60068-2-75, Needle flame compliant to IEC 60598-1. 850°C Glow wire test compliant to IEC 60598 and Heat ageing at 140°C for 168 hours compliant to IEC 61195.
